

# POSTER LIST

- 1 Alyssa Dumoulin**  
The development of GAL-9-specific Nanobodies for improving immunotherapy of cancer
- 2 Angel Kuo**  
Development of mucinase fusion proteases to target glycoform-specific IgA1
- 3 Anne Halpin**  
ABO tools for the 21<sup>st</sup> century: Glycan-functionalized beads allow precise characterization of subtype-specific IgG and IgM ABO antibodies
- 4 Antoine Caillon**  
Neuraminidase 1 depletion protects against Imiquimod-induced psoriasis in the mouse model
- 5 Ben Tiet**  
A ratiometric substrate for studying glucocerebrosidase activity in living cells
- 6 Bill Vouronikos**  
O-GlcNAc modification & its effects on the methylation status of *E. coli* protein Tsr
- 7 Brendon Medley**  
Characterization of a novel O-glycopeptidase from the commensal organism *Akkermansia muciniphila*
- 8 Brian Lowrance**  
Structural and functional characterization of the *Clostridioides difficile* glycosyl hydrolase CcsZ
- 9 Carmanah Hunter**  
Investigating the roles of polysialic acid in T cell biology
- 10 Charlotte Olagnon**  
Ultrahigh-throughput droplet-based microfluidic screening to discover new efficient enzymes that convert B type red blood cells to universal O type blood
- 11 Chih-Lan Lin**  
Semisynthesis of N-glycans for building genetically encoded liquid glycan arrays
- 12 David Firer**  
Between cellulose and chitin, the unique architecture of the chytrid cell wall
- 13 Duong Bui**  
Influence of divalent metals on DC-SIGN-glycan binding
- 14 Edward Schmidt**  
Interrogating Siglec-ganglioside interactions using liposomal nanoparticles
- 15 Elham Koosha**  
Cartilage PGs inhibit BMP signaling through the canonical Smad pathway during endochondral ossification
- 16 Ellen Hayhoe**  
Mapping *in vivo* organ specific glycan binding preferences using genetically encoded multivalent Liquid Glycan Array (LiGA)
- 17 Emily Rodriguez**  
Characterization of the putative O-acetyltransferase CcsI: Role in cellulose biofilms
- 18 F. Ifthiha Mohideen**  
The host glycomic response to influenza H1N1 as a function of obesity
- 19 Faezeh Jame Chenarboo**  
miRNA regulation of  $\alpha$ -2,6-sialylation: Comprehensive analysis of ST6GAL1 & 2
- 20 François Le Mauff**  
Origin and functional role of galactose in the *Aspergillus fumigatus* matrix exopolysaccharide galactosaminogalactan
- 21 Guilherme Meira Lima**  
Multivalent display of lectins on phage for studying glycans on the cell surface
- 22 Helia Dehghan Harati**  
Mapping miRNA regulation of core fucosylation
- 23 HIRAK SAXENA**  
Towards an experimental system for the examination of protein mannosylation in Actinobacteria
- 24 Isis Ip**  
Characterization of glycoside hydrolase GH36 members for blood type conversion
- 25 Jackline Irungu**  
Characterization of the sialylome and O-glycome of healthy broiler chicken gastrointestinal mucin
- 26 Jaesoo Jung**  
Elucidating the interactions between CD33 and sulfated carbohydrates and their relevance to Alzheimer's disease
- 27 Jeffrey Tingley**  
SACCHARIS: A sweet tool for accurate functional prediction of carbohydrate active enzymes

- 28 Jolene Garber**  
Isolation of bovine milk oligosaccharides and chicken mucus *O*-glycans for studies of *Clostridium perfringens* metabolism
- 29 Joshua Kofsky**  
Efficient synthesis of azido sugars using fluorosulfuryl azide diazotransfer reagent
- 30 Kamal Narayana**  
Investigating seasonal and dietary influences on the concentrations of bio-active milk glycans in dairy cows
- 31 Kejia Yan**  
Genetically encoded libraries of macrocyclic covalent inhibitors of glutaminolysis: Enabling metabolic engineering in cancer
- 32 Kelli McCord**  
Siglec regulation of neutrophils and monocytes using a liposome-based approach
- 33 Kelly Kwong**  
*Pseudomonas aeruginosa* evasion of neutrophil antibacterial functions in early Cystic Fibrosis lung infection
- 34 Leeann Klassen**  
Visualizing the effects of prebiotics on the intestinal communities of mammals using Fluorescent Polysaccharides
- 35 Mackenzie Melvin**  
Emerging glycomics methods for the detection and quantification of *O*-acetylated sialic acids in novel mice models
- 36 Marie Boddington**  
Combining chemoenzymatic synthesis and cell-surface glycan engineering to probe glycan-protein interactions
- 37 Marissa King**  
Shining a light on prebiotic-probiotic fructan-microbial interactions in the rumen
- 38 Mirat Sojitra**  
Genetically encoded multivalent liquid glycan array displayed on M13 bacteriophage
- 39 Nevin Elsayed**  
The development of pharmacophore and QSAR models for NEU3 and NEU4
- 40 Nicole Thompson**  
Sequon engineering improves *O*-glycosylation efficiency by the human polypeptide *N*-acetylgalactosaminyl transferase 2 and two orthologues
- 41 Ninoschka D'Souza**  
Advancing a novel therapeutic for the prevention of hypoglycemia in type 2 diabetes mellitus
- 42 Nitin**  
Evaluation of *O*-glycan release methods
- 43 Noam Steinberg**  
Modulatory effects of ganglioside GM1 on microglia activation
- 44 Parisa Raeisimakiani**  
SARS-CoV-2 infection alters the breastmilk glycomics
- 45 Rajneesh Bains**  
Discovery and characterization of a new glycoside hydrolase family from *Streptococcus pneumoniae* TIGR4
- 46 Rita Nehmé**  
Galectin-7-specific single-domain camelid antibodies for the treatment of triple-negative breast cancer
- 47 Roger Ashmus**  
Development of fluorescence-quenched substrate probes for multiplexed imaging of glycosidase activity within live cells
- 48 Ruben Warkentin**  
Investigating ankyrin repeats as glycan binding protein scaffolds for tumour associated carbohydrates
- 49 Rui Qin**  
Serum glycomic profiling identifies pre- and post-vaccination markers of response to influenza vaccine
- 50 Simin Jafaripour**  
In situ, *O*-glycomic, and functional characterization of the gut mucus sialic acid *O*-acetylome of complex *O*-glycans derived from human and murine Mucin-2
- 51 Taylor Gray**  
Metabolic oligosaccharide engineering for the development of novel sialyltransferase inhibitors
- 52 Thu Chu**  
Investigating the miRNA regulatory landscape of OGT and OGA via the 3'UTR and 5'UTR regions utilizing the miRFLuR high-throughput platform
- 53 Tigist Batu**  
Mapping the miRNA regulation of  $\alpha$ -1,2 fucosylation
- 54 Won-Yong Song**  
Identification of protein mannosylation on an actinobacterial penicillin binding protein
- 55 Xinghai Liu**  
miRNA regulation of fucosyltransferase 5
- 56 Youjin Kim**  
Developing antibody-drug conjugates through site-specific glycoengineering
- 57 Zeinab Jame Chenarboo**  
Next generation Siglec tools for ultrasensitive glycan ligand detection
